(Mark ALL conditions that apply; a blank response confirms the condition(s) do not apply to this waste stream.)

This form must be signed by a person authorized to represent the generator. If the individual signing the Waste Profile is a broker or other agent not employed by the generator of the waste, the generator must provide written notification (on generator letterhead) documenting the authority granted that individual.

I authorize Envirite to make corrections to this waste profile. I understand that I will be required to confirm any changes in writing, excluding to Sections A, B, C and D.
☒ Yes ☐ No

I hereby avow that any pertinent information that is known by the generator concerning possible hazards has been disclosed. I certify that, to the best of my knowledge, all statements and attachments are correct and accurate representations of this waste material.

Attachment J

This certification statement must be provided by the generator of non-hazardous waste unless analysis is provided for each parameter identified below.

Certification Form

Profile #: _____

Generator Name: ArcelorMittal USA LLC

Illinois ID #: _____

Generic Waste Name: Chromic acid spill clean up debris

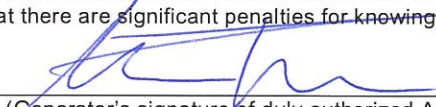

Process Which Generated Waste: _____

I certify that the following constituents (checked no below) are not present in my waste stream above the regulatory level identified in 35 IAC 725, Appendix I:

Characteristics of Hazardous Waste: Indicate if this waste contains any characteristics above regulatory level.

Constituent	Regulatory Threshold Level, ppm	Results of the Profile, ppm	Constituent	Regulatory Threshold Level, ppm	Results of the Profile, ppm
D004 Arsenic	5.0	BRL	D025 p-Cresol	200.0	BRL
D005 Barium	100.0	BRL	D026 Cresol	200.0	BRL
D006 Cadmium	1.0	BRL	D027 1, 4-Dichlorobenzene	7.5	BRL
D007 Chromium	5.0	BRL	D028 1, 2-Dichloroethane	0.5	BRL
D008 Lead	5.0	BRL	D029 1, 1-Dichloroethylene	0.7	BRL

D023 o-Cresol	200.0	BRL			
D024 m-Cresol	200.0	BRL			

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry to the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is true, accurate, and complete. I have used intimate knowledge of our process which generates the waste and adequate Material Safety Data Sheets as defined below, to determine the hazardous constituents which I have certified that are not contained in this waste in accordance with 35 IAC 722.111 (d). I am aware that there are significant penalties for knowingly submitting false information, including the possibility of fine and imprisonment.

Title: Environmental Project Engineer

Note to Generator: The hazardous constituents which you have certified as not being present are subject to verification analysis at the receiving facility.

Definitions:

1. Manufacturing Process – for the purpose of these analyses requirements, a manufacturing process is limited to a controlled manufacturing operation which combines specific ingredients and follows quality control procedures to obtain a specific product.
2. Adequate Material Safety Data Sheets (MSDS) – a material safety data sheet which identifies the exact percentage of each constituent identified in 35 IAC 721, Appendix H in the material, compound, or product.
3. Intimate generator knowledge – the generator's ability to use experience, knowledge of his process and adequate MSDS to determine the exact percent of each hazardous constituent (as identified in 35 IAC 721 Appendix H) present in the waste.
4. Lab Pack – small containers packed in absorbent material inside an overpack as defined in 35 IAC 724.416.
